

6.2 Panel Recontact Protocol

For participants who completed the interview and agreed to be contacted again, follow-up timing will be determined by the contact-list manager. Contact may occur at a later stage when additional data is required.

This protocol is designed to allow future research teams to recontact participants for additional data collection. All communication must follow the same ethical and data handling standards as the initial fieldwork.

Only participants who explicitly consented to future contact may be recontacted.

6.2.1 Initiating Contact

Below are sample messages to send when initiating the follow-up

English:

Hi! This is [Initials] from the AI Pop-Up Lab, you previously participated in our study "Building an Artificially Intelligent Opinion Pollster" on [date]. Thank you again for taking part.

You indicated that you would be open to being contacted again. We would like to follow up with a short re-interview. We will send up to 5 messages, and for each one you can respond with a 1–2 minute voice message. You can reply at your own pace and send each response separately.

Would you be open to participating? If so, we will send the questions shortly. Thank you in advance for helping science move forward!

Dutch:

Hallo! Dit is [initialen] van het AI Pop-Up Lab, je hebt eerder deelgenomen aan ons onderzoek "Building an Artificially Intelligent Opinion Pollster" op [datum]. Bedankt nogmaals voor je deelname.

Je gaf aan dat je open stond om opnieuw benaderd te worden. We willen graag een kort vervolginterview doen. We sturen je maximaal 5 berichten, waarop je telkens

kunt reageren met een spraakbericht van 1–2 minuten. Je kunt antwoorden wanneer het jou uitkomt en elk antwoord afzonderlijk versturen.

Zou je hieraan willen deelnemen? Als dat zo is, sturen we zo meteen de vragen. Alvast bedankt voor je bijdrage aan dit onderzoek!

6.2.2 Follow-Up Questions

Once a participant has agreed to participate in the recontact, send the following questions one by one.

Framing statement (*Schwarz stage 1: comprehension*)

English:

"In this study we're interested in how you think through your vote choice for the Tweede Kamer, not just who you would vote for, but the full process of how you get there. We would like you to speak as freely and in as much detail as feels natural. There are no right or wrong answers."

Dutch:

"In dit onderzoek zijn we geïnteresseerd in hoe u nadenkt over uw stemkeuze voor de Tweede Kamer, niet alleen op wie u zou stemmen, maar het hele proces van hoe u daar komt. We zouden het op prijs stellen als u zo vrijuit en gedetailleerd mogelijk antwoordt, zoals het u het beste uitkomt. Er zijn geen goede of foute antwoorden."

Q1 Information consumption (*Schwarz Stage 2 accessible information*)

English:

"Thinking about the past few weeks, what news or events have been on your mind? Please take a moment before you answer. We are interested in everything that comes to mind, including where you came across it."

Dutch:

"Als je terugdenkt aan de afgelopen weken, welk nieuws of welke politieke gebeurtenissen hebben je beziggehouden? Neem even de tijd voordat je antwoordt. We zijn geïnteresseerd in alles wat in je opkomt, inclusief waar je het bent tegengekomen."

Q2 Voting Strategy (*Schwarz Stage 2 accessible information*)

English:

"Most people don't think much about how they decide who to vote for, they just do it. We're curious about that process itself.

When deciding who to vote for in the Tweede Kamer election, how much do you typically look into the parties or candidates beforehand. Do you actively seek out information, rely on what you already know, or somewhere in between? And do you tend to compare parties on the same issues, or focus mainly on one or two that already appeal to you? Tell us what that process looks like for you."

Dutch:

"De meeste mensen staan er niet zo bij stil hóé ze beslissen op wie ze stemmen, ze doen het gewoon. Wij zijn juist benieuwd naar dat proces zelf.

Als je beslist op wie je stemt bij de Tweede Kamerverkiezingen, hoeveel verdiep je je dan meestal van tevoren in de partijen of kandidaten? Zoek je actief informatie op, vertrouw je vooral op wat je al weet, of zit je daar ergens tussenin? En vergelijk je partijen meestal op dezelfde onderwerpen, of richt je je vooral op één of twee partijen die je sowieso al aanspreken? Vertel ons hoe dat proces er voor jou uit ziet."

Q3 Reasoning and weighting (*Schwarz Stage 3 attitude construction*)

English:

"When you think about which parties you'd consider voting for in the Tweede Kamer elections, what actually goes through your mind? Walk us through it.

You might touch on which parties come to mind as options, how well their programme fits your values, specific policies you care about, your impressions of the party leaders, which parties have a realistic shot at winning, what people you trust have said and anything else that shapes your thinking."

Dutch:

"Als je nadenkt over welke partijen je zou overwegen, wat gaat er dan eigenlijk door je hoofd? Neem ons mee in je gedachten. Je kunt het hebben over welke partijen als opties bij je opkomen, hoe goed hun programma bij jouw waarden past, specifieke beleidspunten waar je om geeft, wat je van de partijleiders vindt, welke partijen een realistische kans hebben om te winnen, wat mensen die je vertrouwt erover hebben gezegd, en alles wat verder je denken beïnvloedt."

Q4 Vote choice (*Schwarz Stage 4-5 judgment and formatting*)

English:

"Taking everything you've just talked about into account: if a Tweede Kamer election were held today, which of the following parties would vote for? Tell us in detail why this party specifically, and what goes through your mind as you bring all your considerations together into an actual choice. How well does this party reflect what you're really looking for, and how certain do you feel about it?"

Dutch:

"Als je alles wat je net hebt verteld meeneemt: als er vandaag Tweede Kamerverkiezingen waren, op welke van de volgende partijen zou je dan stemmen? Vertel ons in detail waarom precies deze partij, en wat er door je hoofd gaat als je al je overwegingen samenbrengt tot een daadwerkelijke keuze. Hoe goed weerspiegelt deze partij wat je echt zoekt, en hoe zeker voel je je over je keuze?"

PVV (Partij voor de Vrijheid)	SP
Progressief Nederland	Forum voor Democratie
(PRO)/GroenLinks–PvdA	Partij voor de Dieren
VVD	ChristenUnie
NSC (Nieuw Sociaal Contract)	SGP
D66	DENK
BBB (BoerBurgerBeweging)	Volt
CDA	JA21
50plus	Other
Groep Markuszower	Blank
BIJ1	
BVNL	

6.2.2 Response Scenario

We will send you the questions one by one, each as a separate message. Please only open and read a question when you are ready to record your answer. Try not to read ahead to the next one before you have answered the current one. This helps us get your most natural and spontaneous responses. Take your time, and answer each question with a voice message when you feel ready.

6.3 Data Naming and File Management

Messaging thread naming and audio file naming serve different purposes and should be handled separately.

Chat name = used for tracking communication and follow-up attempts

File name = used for storing and analysing recordings

These should not be identical, but must share the same Participant ID, interview type, and date for linkage.

6.3.1 Messaging Thread Naming

Messaging threads are used to manage participant communication and track follow-up attempts.

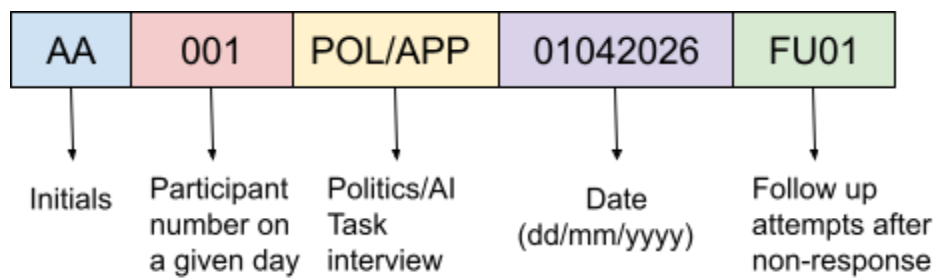

Format:

ParticipantID + InterviewType + Date + FU##

AA001POL01042026FU01

Where:

- AA001 = Participant ID
- POL / APP = Interview type (Politics or AI)
- 01042026 = Date of initial interaction (DDMMYYYY)
- FU01 = Follow-up attempt number

Rules:

- Use the same thread for all follow-up communication with that participant
- Increment the FU number with each recontact attempt (FU01, FU02, FU03)
- This is used to track non-response
- If there is no response after 3 follow-up attempts, stop contacting the participant
- Do not include WhatsApp file names in the chat title

6.3.2 Audio File Naming

Messaging apps such as WhatsApp automatically assign names to voice messages in the format:

PTT-YYYYMMDD-WAXXXXX

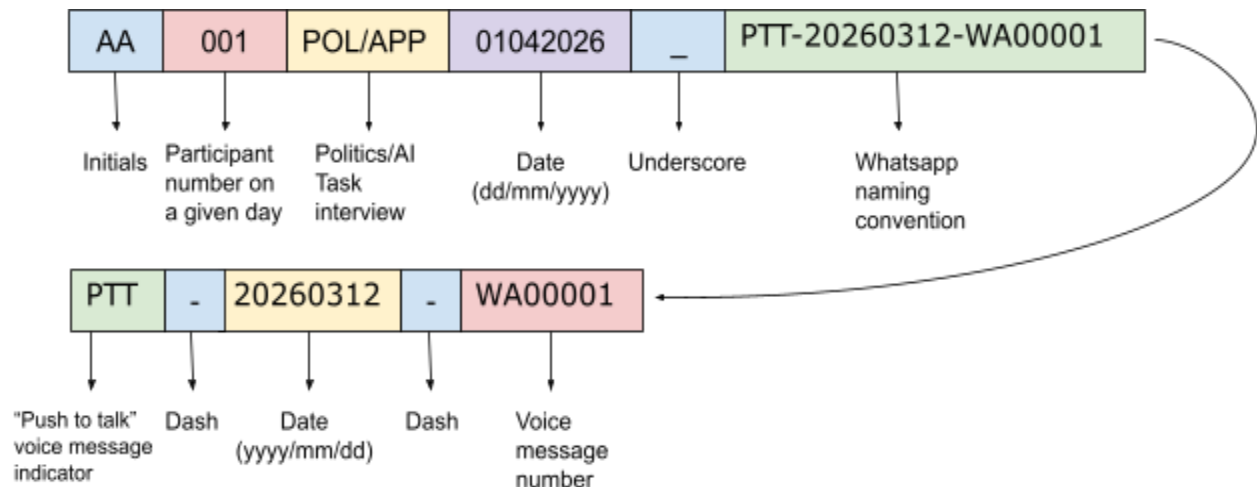

When exporting or saving recordings, prepend the Participant ID, interview type, and date to the original file name.

Format:

ParticipantID + InterviewType + Date + "_" + original file name

Example:

AA001POL01042026_PTT-20260312-WA000001

**Rules:**

- Always preserve the original WhatsApp file name
- Do not edit or remove the PTT portion
 - This ensures timestamp information is retained
- Use the same Participant ID and date as in the messaging thread

6.3.3 Saving and Storage Procedure

After collecting recordings:

- Download all voice messages from the messaging app to the device
- Immediately transfer files to the designated research drive
- Place files in the correct folder
- Ensure all files are correctly renamed before uploading
- Do not leave recordings stored only on personal devices

Send the following message into the chat after all voice-recordings have been downloaded.

"Thank you so much for participating! your contribution is greatly appreciated. As a precaution for data security, we would ask you to delete this conversation from your

device after reading. Please also be aware that WhatsApp processes data through third-party services.”

Hartelijk dank voor uw deelname, uw bijdrage wordt zeer gewaardeerd. Als voorzorgsmaatregel voor de gegevensbeveiliging vragen wij u vriendelijk om dit gesprek van uw apparaat te verwijderen nadat u het heeft gelezen. Houd er ook rekening mee dat WhatsApp gegevens verwerkt via diensten van derden.
